

DOAN'S STRENGTH ALL FACTS ARE BULLISH; METAL FACTORS BEARISH

Money Rises to Highest of the Year and Stock Prices Fall.

MOVEMENTS ARE SMALL
Day's News Offers Encouragement, Particularly of Steel Tonnage Increase.

NEW YORK, Sept. 10.—Very little remained today of the strength of yesterday's crop report. In the main, the steel market rose to 43 per cent, the wheat rate of the year, prices fell to the lowest of the day, but with no increased activity.

News of the day offered ground for encouragement, especially the unfilled tonnage figures of the United States steel corporation for August, which showed an increase of 200,000 tons over preceding month and established a new high record in the history of the company.

Some of the speculative favorites moved more than fractionally until in final dealings, all wider fluctuations were made by the various specialties.

An international Harvester, Mexican Petroleum, one of the day's active issues, and several of the state-wide specialties of the American Tobacco company. These issues registered maximum advances of 2 to 35 points, with a one-half rise in General Electric, but the local bond market shaded after a steady rise. Total sales (par value), \$15,000.

Panama advanced 1 per cent on call.

Closing Stock List.

	Sales	High	Low	Close
Alumina Copper	8,500	85 1/2	85 1/4	85 1/4
